## **Record Holding Eagle Takes Off**

At a length of over 43 inches, with three props driven by three 550 electric motors, Model Racing Products, Inc. (MRP) proudly introduces the Gentry Eagle. Modeled after the real 110-foot racing yacht, which holds the record for crossing the Atlantic Ocean (3,446 statute miles) in 62 hours, 7 minutes, this sleek cruiser is capable of speeds in excess of 20 miles-per-hour. Utilizing MRP's new heavy-duty microswitch speed control, two six-cell ni-cad batteries, dual rudders and slick V-hull design, this racing yacht runs true and straight in even rough water.
